

HOT WEATHER POLICY PARENT INFORMATION

Air conditioners are located in all classrooms and while some are more efficient than others there are empty spaces to which classes can be moved.

Staff will not undertake activities outdoors during times of extreme heat. Consideration will be given to cancelling or modifying any school events scheduled for outdoors when the expected temperature exceeds 36 degrees.

The school will check the Bureau of Meteorology website for a local reading at Adelaide Airport before making its decision to send children outside or not. Temperature checks will be made before breaks at 10:30am and 12:45pm. If the temperature is 36 degrees or more then it is deemed to be Hot/Extreme weather, and the siren will ring 3 times to indicate that students stay in at recess or lunch.

Leadership can override the policy if conditions change.
