

HOT WEATHER POLICY PARENT INFORMATION

Air conditioners are located in all classrooms, however the Sea Dragon and Pelican Buildings are the only classrooms that have reverse cycle air conditioning and the remaining buildings have evaporative air conditioners.

Parents may choose to pick up their child from 2:15pm if 36 degrees or more is predicted on the evening news the day prior in the morning paper.

Parents will need to enter via the front office and sign out their children before collecting them from the classroom.

In light of the Department for Education and Child Development policy, parents have the option of picking up their child from 1:00pm if the predicted temperature is above 38 degrees.

The school will check the Bureau of Meteorology website for a local reading at Adelaide Airport before making its decision to send children outside or not. Temperature checks will be made before breaks at 11:00am and 12:45pm. If the temperature is 36 degrees or more then it is deemed to be Hot/Extreme weather, and the siren will ring 3 times to indicate that students stay in at recess or lunch.

Leadership can override the policy if conditions change.
